# DOUBLE GRIP TIRES

*The F.G. Schenuit  
Rubber Co.  
Baltimore, Md.*

# DOUBLE GRIP

## DESIGN D.

# Air Cooled TIRES

# BUILT TO EAT THE BEST

## The acme of PERFECTION

A product of unequalled  
MERIT.

## The highest degree of ATTAINMENT.

## IN tire construction, the LAST WORD.

A circular stamp with a double-lined border containing the text "RETURN TO DESIGN DIVISION". The stamp is oriented vertically and is partially obscured by a large, bold, black "D" at the bottom. The text "RETURN TO" is at the top, and "DESIGN DIVISION" is at the bottom. The stamp is located on a page with a light beige background.

## LIFE SAVERS

Acknowledged 100% effective against skidding or slipping, under most unfavorable conditions, **DOUBLE GRIP AIR-COOLED TIRES** have been dubbed **LIFE SAVERS** by motorists who use them.

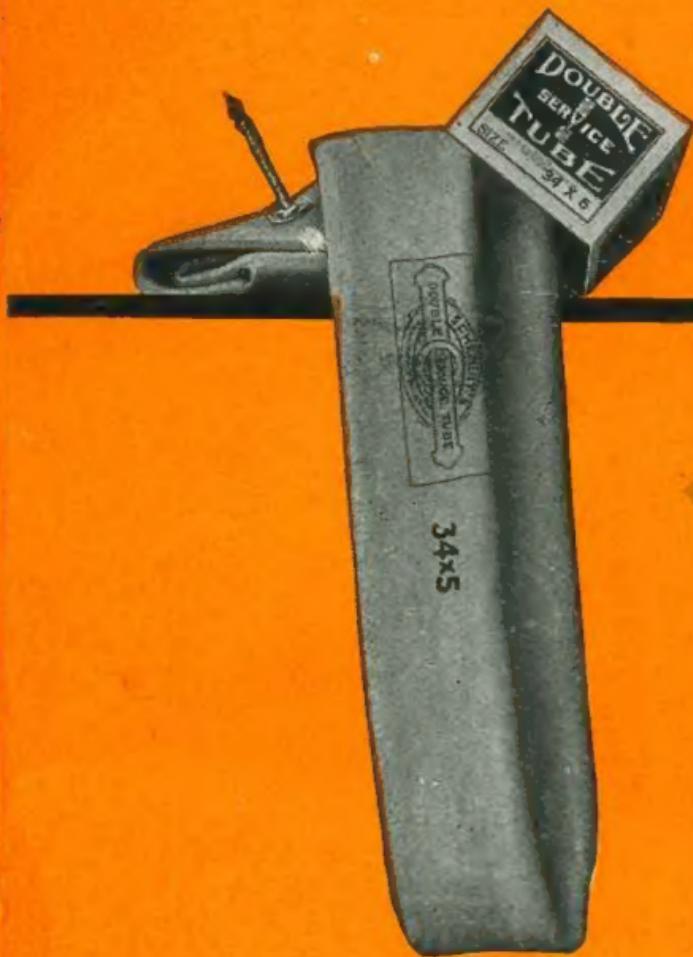

### AIR COOLED

The **AIR-COOLED** feature consists of a series of radius ribs, across the side walls which, give additional surface for **HEAT RADIATION**, reducing, to a minimum, over-heating, the bane of all pneumatic tires.

### RUT-PROOF

Aside from the air-cooling feature, the ribbed side walls serve an additional purpose. They are so designed as to offer maximum resistance to side wall abrasions, the result of curbstone wear and other causes to which tires are subjected.
